

# **Lovonda policy for healthy community**

## **A vision for primary health care through Penama health promotion unit from 2018-2020**

### **Policy statement**

**This Policy outlines the Penama health commitment to healthy island vision through Primary health care and setting approach**

**By adopting the healthy Island vision, Penama health hopes to ensure that the environment where all people from Lovonda community live, work and play support their health and well being**

**The Primary health care concept is emphasise heavily in this policy as it is to achieving healthy island Vision**

## **Reason for the policy**

**This policy provides a strategic direction for the application for the primary health care. The main areas of concern are addressing the negative impacts on human health targeting non communicable disease that will require a stronger primary health care system that includes both public health and clinical services.**

## **Vision**

**To ensure all people in Lovonda community supports their health and well being**

## **Guiding principles**

- 1- Tobacco free community- Areas set in the community for People who smoke, any member of the community found smoke in the community is penalise by chief and the chairman of the community.**
- 2- Alcohol is not allowed in the community but only for specially function. Any members of the community found with the influence of alcohol are subject to the chief's law.**
- 3- Animals are not allowed to walk freely in the community, any member of the community left their animal e.g. Pigs, cattle's goats is subject to the chiefs law**
- 4- No community members are allowed to shell kava & alcohol after 9 o'clock at night.**

**5-** Imported food is strictly shell in the community.
